PROJECTS

Real-Time chat application
[college mini project]

August 2022 - December 2022

• Crafted a stunning and intuitive user interface using cutting-edge web technologies like HTML, CSS, JavaScript, and Node.js, ensuring an immersive and captivating experience.

• Collaborated synergistically within a dynamic team of three, orchestrating seamless meetings to strategize project milestones, delegate tasks, and propel forward with unstoppable momentum.

• Key Technologies and Skills:

- HTML, CSS, JavaScript (The trifecta of web sorcery)
- Node.js (The powerhouse that fueled our ambitions)
- Socket.IO (The conduit of real-time marvels)
- JWT (JSON Web Tokens) (The guardian of secrets)
- Team Collaboration and Communication (The symphony of unity)
- Project Planning and Management (The art of orchestration)

Spotify Clone
[Personal Project]

July 2023

• Embarked on an exhilarating solo journey to craft an alluring Spotify clone, immersing users in a symphony of awe and delight.

• Transcended limitations through the wizardry of modern web technologies and frameworks, such as React or Angular, conjuring a dynamic and responsive application that dances harmoniously across screens of all sizes.

Python login Form

may 2022

• Conceptualized and developed a Python login form, showcasing my proficiency in building intuitive user interfaces and data validation.

• Utilized the Tkinter library to create a visually appealing and interactive login form, providing users with a seamless authentication experience.

EDUCATION

B.Tech in Information

Technology

Dr. AITH Kanpur

Aug 2020 – Present   CGPA: 8.0

Class XII

C.L. inter college

June 2018   76.4%

Class X

C.L. inter college

June 2016   81.8%

SKILLS

Python | HTML | CSS | Git | C++
C | MYSQL | MongoDB | OOPs
Java script | Problem Solving
